

USGBC LEED™ Credit Contributions: C/S Pedisystems® Entrance Flooring

LEED EQ Credit 5, Pollutant Source Control:

Employ permanent entryway systems (grilles, grates, etc.) to capture and hold dirt, particulate, etc. from entering the building at all high volume entryways.

LEED MR Credits 4.1, 4.2 and 6, Recycled Content and Rapidly Renewable Material:

C/S now offers recycled rubber and rapidly renewable teak, IPE, bamboo and cork tread insert options.

LEED EQ Credit 4.2, Low-Emitting Paints and Coatings:

C/S offers environmentally-friendly (no VOC) powder coat finishes that cost no more than standard anodized finishes and are up to twice as abrasive resistant (testing available).

LEED EQ Credit 4.3, Low-Emitting Carpet:

C/S PediTred® meets the Carpet and Rug Institute's standard for good indoor quality.

LEED ID Credit:

C/S PediTred architectural mats have earned MBDC Cradle to Cradle: Silver Certification.

C/S now offers a PVC-free hinge connector for PediTred products.

C/S sustainable products can be viewed by visiting www.buildinggreen.com or www.c-sgroup.com

In USGBC LEED™ 2.2 EQ Credit 5, the architect/designer is encouraged to specify permanent entryway systems (grilles, grates, etc.) to capture dirt and other particulates at all high volume entryways. The basis of the credit is to stop the dirt before it enters the building and contributes to poor indoor air quality. Specifying an entrance flooring system will also reduce the amount of cleaning chemicals used and help prolong the life of other textile and hard surface finishes in the building.

A C/S Pedisystem mat or grid not only fills this need but goes way beyond, environmentally. Listed on the left are the ways that Pedisystem products can contribute toward your goal of LEED certification.
